VARY

Rental Management Software

Overview of features

Web portal

Your customers can consult your catalogue, follow the progress of their files, see where their machines are, download their latest invoices and view their outstanding payments.

Stock

Update your equipment catalogue, place supplier orders taking into account your different purchasing conditions, and carry out inventories.

Invoicing and price management

All the components are there to save you precious time!

- Invoice monthly for days of machine use (manage working days, weekends, public holidays and bad weather).
- Internal invoice validation and pro forma process available.
- Invoices sent by batch (email + pdf) or electronically via UBL.

Maintenance and repairs

Do you maintain and repair your machines and those of your customers? Do you establish maintenance contracts with your customers? Vary will meet your expectations.

- Plan maintenance and repairs.
- Thanks to the mobile application, technicians can allocate parts and working hours directly.
- Keep an overview of the machine's history.

Tracking system link

Linking your ERP with the telemetry of your machines has become a must.

- Trackunit, Sensolus, ZTR, cTrack, GeoTracer,...
- Reduce your maintenance costs by automatically reading meters/odometers.
- Identify and invoice customers who do not respect their contracts by using the machine outside the scheduled hours and days.

VARY

Testimonial :

> " Thanks to Vary the pricing and the periodical invoicing are not a problem anymore."

Responsible Invoicing

Management of periodic checks

Drastically reduce your administrative management of mandatory periodic inspections.

- Generate and send the list of machines to be checked to your inspection service.
- Your inspection body updates the certificates and the next inspection dates in Vary
- When booking equipment, Vary indicates the dates of the next inspections as well as the results of the previous ones.

Reporting

Dozens of reports are at your disposal to analyse your activity.

- Keep an eye on your costs and margins at all times.
- Analyse in real time the occupancy rate and the profitability of your equipment.

⊕ Mobile applications
